

1. Place the first programmed remote in the backup slot inside the center console. With your foot off the brake pedal, press and release the push button ignition switch.
2. Wait until the dash stops "dinging" and then press and release the push button ignition switch again.
3. Remove the remote control.
4. Within 10 seconds, place a second programmed remote control in the backup slot. Press and release the push button ignition switch.
5. Wait until the dash stops "dinging" and then press and release the push button ignition switch again.
6. Remove the remote control.
7. Place the unprogrammed remote control in the backup slot and press and release the push button ignition switch. You will see something like "Key Programmed" displayed on the dash.

Programming is now complete. With your foot on the brake pedal, press the push button ignition switch to verify the remote control functions operate and your vehicle starts with the new remote control.

If programming was not successful, wait 10 seconds and repeat Steps 1 through 7. If you are still unsuccessful, take your vehicle to an authorized dealer.
