

MOTORCRAFT® FUEL SYSTEM MAINTENANCE KIT

PM-30-K

Today's high pressure, high heat engines demand clean combustion chambers, fuel injectors, and intake valves to function efficiently. Fuel, oil, and other operating variables can contribute to carbon buildup inside the engine. Even small amounts of carbon deposits on engine components can lead to drivability issues and reduced engine performance.

The Motorcraft Fuel System Maintenance Kit is our premium offering. The kit is quickly administered by a Ford Dealer or Lincoln Retailer technician with special equipment and is formulated to provide noticeable drivability improvements.

Features and Benefits:

- Restores engine performance
- Restores power
- Effective in all gasoline engines

Combustion Chamber

Before

After

Valves

Before

After

Recommended at every other oil change.

Use these Motorcraft fluids in Ford & Lincoln vehicles for optimum maintenance of gasoline engines.

Services should be performed when experiencing performance/drivability issues, or routinely at recommended service intervals.

MOTORCRAFT® 44K® FUEL SYSTEM CLEANER

PM-44-A 

Motorcraft 44K Fuel System Cleaner provides powerful cleaning for modern engines including GDI fuel delivery systems. The proprietary formula is designed to clean the entire induction system, including fuel injectors, intake valves, ports, fuel filters, and combustion chambers. Motorcraft 44K Fuel System Cleaner is formulated to remove deposit buildup. It is easily administered during regular maintenance by simply pouring into the fuel tank. It is safe to use on Ford and Lincoln engines.

Features and Benefits:

- Restores engine performance
- Restores power
- Effective in all gasoline engines

Injectors Before

Injectors After

Recommended at every oil change.

Use these Motorcraft fluids in Ford & Lincoln vehicles for optimum maintenance of gasoline engines.

MOTORCRAFT® GASOLINE FUEL MAINTENANCE

Fuel system maintenance is critical for peak vehicle performance. Motorcraft and BG Products, Inc., offer preventive maintenance fuel products for Ford & Lincoln vehicles to help reduce the negative effects of lost combustion chamber efficiency due to contamination. For best results, change engine oil and filter after using these products.

44K® Fuel System Cleaner

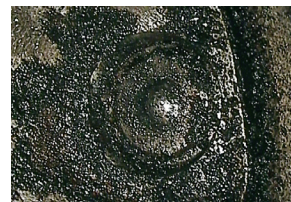

PM-44-A 

Features and Benefits:

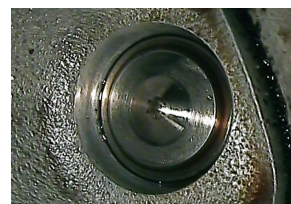

- Helps restore power and performance
- Catalytic converter and oxygen sensor safe
- Compatible with all fuel system materials

Recommended at every oil change.
